

Figure 1 displays 12 panels, each showing a scatter plot of 1000 simulated data points. The panels are labeled 1 through 12 at the top. Each panel has a y-axis ranging from 0 to 100 and an x-axis ranging from 0 to 100. The data points are colored blue and black. The distributions vary across panels, with some showing a clear upward trend and others showing a more random distribution. The panels are labeled 1 through 12 at the top.
